

ULTIMATE ROSE

Unique Features

We describe Ultimate Rose as *the most authentic timber-alternative sash window on the market* for good reason. It includes a range of unique features and options that elevate it beyond a standard uPVC sash window. Homeowners know the difference.

And while other sash windows may include *some* of these features, it's when they're combined that they become so powerful. For instance, the 35mm midrail + matching slim chamfered profiles + mechanical joints + authentic astragal bars + our no-cap seamless technology gives a clean, slim, solid appearance that is *exactly* like timber.

Individual features make good headlines, but for a truly authentic sash window that replicates hardwood (but without the painting or maintenance), those features need to work together as a whole. That's what Ultimate Rose delivers.
